## Test Case

### 1. Purpose

This Test Case Specification document for the Boolean Algebra Calculator defines a test case for an item that should be tested. Each test case has six categories: Test case ID, test description, test data, expected results, actual results, and pass/fail status. The test case ID consists of the class of test case (either STC for standard or ATC for additional) and the number of the test. The test case description is a summary of the program's behavior that the input is intended to test. The test data is the contents of the input. The expected result is what the program is intended to output. The actual result is what the program outputs after the conclusion of the test. The pass/fail status indicates if the program outputs the correct value with no errors caused.

### 2. Standard Test Cases

#### *Test Case ID* **STC01**

<i>Test Case Description</i>	Verify operators are parsed in the correct order
<i>Test Data</i>	(T   F) \$ F
<i>Expected Results</i>	True
<i>Actual Results</i>	True
<i>Pass/Fail Status</i>	Pass

#### *Test Case ID* **STC02**

<i>Test Case Description</i>	Ensure NOT operator functions correctly on parenthesized expression
<i>Test Data</i>	!(T & T)
<i>Expected Results</i>	False
<i>Actual Results</i>	False
<i>Pass/Fail Status</i>	Pass

#### *Test Case ID* **STC03**

<i>Test Case Description</i>	Ensure sets of multiple parenthesized expressions are read left to right
<i>Test Data</i>	(F @ T)   (T @ F)
<i>Expected Results</i>	True
<i>Actual Results</i>	True
<i>Pass/Fail Status</i>	Pass

#### *Test Case ID* **STC04**

<i>Test Case Description</i>	Verify AND operator only returns True when both operands are True
<i>Test Data</i>	(T \$ T) & F

Boolean Algebra Calculator	Version: 1.0
Test Case	Date: 02/05/2024
Project Test Cases	

*Expected Results* False  
*Actual Results* False  
*Pass/Fail Status* Pass

*Test Case ID* **STC05**

<i>Test Case Description</i>	Ensure NOT operator functions correctly within expression
<i>Test Data</i>	!F   !T
<i>Expected Results</i>	True
<i>Actual Results</i>	True
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC06**

<i>Test Case Description</i>	Check nested expressions evaluate in correct order
<i>Test Data</i>	(((((T   F) & F)   (T & (T   F))) @ (T @ T)) \$ (! (T   F)))
<i>Expected Results</i>	True
<i>Actual Results</i>	True
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC07**

<i>Test Case Description</i>	Check that extraneous parentheses are handled correctly when True
<i>Test Data</i>	((F \$ ((T   F) & (F @ (T   F))))   (T \$ (T & F)))
<i>Expected Results</i>	True
<i>Actual Results</i>	True
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC08**

<i>Test Case Description</i>	Check that extraneous parentheses are handled correctly when False
<i>Test Data</i>	(((! (T \$ F)) & (T @ T))   ((F   T) & (T \$ T)))
<i>Expected Results</i>	False
<i>Actual Results</i>	False
<i>Pass/Fail Status</i>	Pass

Boolean Algebra Calculator	Version: 1.0
Test Case	Date: 02/05/2024
Project Test Cases	

*Test Case ID* **STC09**

<i>Test Case Description</i>	Check that extraneous parentheses around operands with NOT are handled correctly when True
<i>Test Data</i>	((T @ T) \$ (F @ T))   ((!T) & (T   (!T)))
<i>Expected Results</i>	True
<i>Actual Results</i>	True
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC10**

<i>Test Case Description</i>	Check that extraneous parentheses around operands with NOT are handled correctly when False
<i>Test Data</i>	((F @ T) \$ (T   (F & F))) & (T & (T @ (!T)))
<i>Expected Results</i>	False
<i>Actual Results</i>	False
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC11**

<i>Test Case Description</i>	Ensure missing operand is handled correctly
<i>Test Data</i>	! & T
<i>Expected Results</i>	Error – invalid expression
<i>Actual Results</i>	Error – invalid expression
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC12**

<i>Test Case Description</i>	Ensure unknown operator is handled correctly
<i>Test Data</i>	T ? T
<i>Expected Results</i>	Error – invalid expression
<i>Actual Results</i>	Error – invalid expression
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC13**

<i>Test Case Description</i>	Ensure mismatched parentheses are handled correctly
<i>Test Data</i>	( T   ) F
<i>Expected Results</i>	Error – invalid expression

Boolean Algebra Calculator	Version: 1.0
Test Case	Date: 02/05/2024
Project Test Cases	

<i>Actual Results</i>	Error – invalid expression
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC14**

<i>Test Case Description</i>	Ensure circular logic is handled correctly
<i>Test Data</i>	T = !(T & T)
<i>Expected Results</i>	Error – invalid expression
<i>Actual Results</i>	Error – invalid expression
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC15**

<i>Test Case Description</i>	Ensure an empty input is handled correctly
<i>Test Data</i>	<empty input>
<i>Expected Results</i>	Error – invalid expression
<i>Actual Results</i>	<empty output>
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC16**

<i>Test Case Description</i>	Ensure extra operators are handled correctly
<i>Test Data</i>	T &&& F
<i>Expected Results</i>	Error – Adjacent inner operations
<i>Actual Results</i>	Error – Adjacent inner operations
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC17**

<i>Test Case Description</i>	Ensure unassigned variables are handled correctly
<i>Test Data</i>	X   Y
<i>Expected Results</i>	Error - invalid expression
<i>Actual Results</i>	Error - invalid expression
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **STC18**

<i>Test Case Description</i>	Ensure incorrectly positioned NOT is handled correctly
------------------------------	--

Boolean Algebra Calculator	Version: 1.0
Test Case	Date: 02/05/2024
Project Test Cases	

<i>Test Data</i>	T!
<i>Expected Results</i>	Error – Expression cannot end in ‘!’
<i>Actual Results</i>	Error – Expression cannot end in ‘!’
<i>Pass/Fail Status</i>	Pass

**Test Case ID STC19**

<i>Test Case Description</i>	Ensure calculator is case-sensitive
<i>Test Data</i>	t & f
<i>Expected Results</i>	Error – invalid expression
<i>Actual Results</i>	Error – invalid expression
<i>Pass/Fail Status</i>	Pass

### 3. Additional Test Cases

**Test Case ID ATC01**

<i>Test Case Description</i>	Error when parsing adjacent Truth values
<i>Test Data</i>	TT
<i>Expected Results</i>	Error – invalid expression
<i>Actual Results</i>	Error – invalid expression
<i>Pass/Fail Status</i>	Pass

**Test Case ID ATC02**

<i>Test Case Description</i>	Parses left to right when there are no ()
<i>Test Data</i>	T F&T&T
<i>Expected Results</i>	T
<i>Actual Results</i>	T
<i>Pass/Fail Status</i>	Pass

**Test Case ID ATC03**

<i>Test Case Description</i>	Parses from left to right inside innermost parenthesis
<i>Test Data</i>	T   (T F&T&T)
<i>Expected Results</i>	Error – invalid expression
<i>Actual Results</i>	Error – invalid expression
<i>Pass/Fail Status</i>	Pass

Boolean Algebra Calculator	Version: 1.0
Test Case	Date: 02/05/2024
Project Test Cases	

*Test Case ID* **ATC04**

<i>Test Case Description</i>	Not Not cancels out
<i>Test Data</i>	!(!T)
<i>Expected Results</i>	T
<i>Actual Results</i>	T
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **ATC05**

<i>Test Case Description</i>	Two operators in a row are handled correctly
<i>Test Data</i>	T  T
<i>Expected Results</i>	Error – invalid expression
<i>Actual Results</i>	Error – invalid expression
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **ATC06**

<i>Test Case Description</i>	Large expressions with unknown variables
<i>Test Data</i>	(T F) & X
<i>Expected Results</i>	Error – invalid expression
<i>Actual Results</i>	Error – invalid expression
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **ATC07**

<i>Test Case Description</i>	NOR returns False when both sides are True
<i>Test Data</i>	T@T
<i>Expected Results</i>	F
<i>Actual Results</i>	F
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **ATC08**

<i>Test Case Description</i>	Single character expression
<i>Test Data</i>	T
<i>Expected Results</i>	T
<i>Actual Results</i>	T
<i>Pass/Fail Status</i>	Pass

Boolean Algebra Calculator	Version: 1.0
Test Case	Date: 02/05/2024
Project Test Cases	

*Test Case ID* **ATC09**

<i>Test Case Description</i>	Operator Symbols are required
<i>Test Data</i>	T AND F
<i>Expected Results</i>	Error – invalid expression
<i>Actual Results</i>	Error – invalid expression
<i>Pass/Fail Status</i>	Pass

*Test Case ID* **ATC010**

<i>Test Case Description</i>	Typing the words those an error
<i>Test Data</i>	True   True
<i>Expected Results</i>	Error – invalid expression
<i>Actual Results</i>	Error – invalid expression
<i>Pass/Fail Status</i>	Pass
